

Viorel Mînză is currently a Professor within the Control and Electrical Engineering Department and Doctoral School at “Dunarea de Jos” University of Galati, Romania. He is teaching Automation Systems and Optimal Control Techniques. He received an ME degree in Computer Engineering from the Polytechnic Institute of Bucharest, Romania, in June 1981, a PhD degree in Automation Systems from the University of Galati, Romania, in December 1993, and an MS and PhD degrees in Computer Science and Automation from the University Franche-Comté France in May 1995. Between 1995-1998, he was an associate professor at Ecole Nationale Supérieure de Mécanique et des Microtechniques, Besancon, France. His research interest has regarded dynamic systems modelling, control-loop implementation, and assembly system design. Lately, his research activity concerns optimization using metaheuristics, machine and deep learning, and optimal control problems using computational intelligence. He received a Doctor Honoris Causa degree from Le Havre University, France, in July 2009. He is a member of IEEE, a Control Systems Society member, and a member of IFAC Technical Committee 5.2.
